

Hyperion Analyzer 7.2: Design Reports

Duración 16 hrs.

Lo que aprenderá:

In this course, you learn to create and administer reports with Hyperion Analyzer. You build simple and complex views of data; create and format spreadsheet reports, charts, pinboard displays, and custom reports; set traffic lighting; and manage formats. You also learn to define data source connectivity, manage user security, and manage report presentations. Exercises provide hands-on practice.

Objetivos Del Curso:

- Analyze data in charts and reports
- Create charts, spreadsheet reports, and composite reports
- Format data in reports
- Add data analysis to reports
- Manage content
- Create pinboards
- Create custom reports
- Manage users, data connections, and reports

Temas Del Curso:

Hyperion Analyzer Overview

- Hyperion Analyzer Benefits
- Architecture
- User Roles

Analyzing Report Data

- Navigating Reports
- Manipulating Data
- Changing Data Visibility
- Distributing Data

Creating Reports

- Data Structure Hierarchies
- Defining Report Queries
- Setting Report Format Options
- Creating Chart Views

Adding Report Analysis Functionality

- Analysis Tools Overview
- Creating Calculations
- Defining Traffic Lighting
- Creating Pinboards
- Managing Analysis Tools
- Comparing Analysis Tools and Essbase Functionality

Managing Repository Content

- Selecting User Preferences
- Managing Content Access
- Distributing Reports
- Linking Related Content
- Reducing Repetitive Member Selection

Designing Advanced Reports

- Relational Data Source Reporting Options
- Creating Custom Reports

Administering Hyperion Analyzer

- Security and Access Overview
- Configuring Authentication
- Creating Data Source Connections
- Managing Users and Repository File Access
- Hyperion Analyzer Analysis Server Console
